

QUALITY AND ENVIRONMENTAL POLICY

The Management of JOARJO, S.L., as part of its General Policy, defines its Quality and Environmental policy and ensures that it is appropriate to the nature, scale and environmental impacts of its products, and is communicated and understood by all the members of the company.

In turn, it also includes Health and Safety as an essential aspect, to which Joarjo assigns all the human and financial resources necessary and it has a "Prevention Plan" that contains the organisational structure, responsibilities, functions and practices as well as the procedures, processes and resources that are necessary to carry out Health and Safety actions in the company.

This Policy is communicated to all those working for or on behalf of JOARJO.

Joarjo's Quality and Environmental Policy is available to the public.

Joarjo's Management undertakes to implement, develop and maintain an Integrated Quality and Environmental Management System as well as to ensure the wellbeing, safety and health of its employees, self-employed workers and workers from other companies who carry out work at our premises.

This Quality and Environmental Policy is based on the principle of continual improvement and provides the framework for setting and reviewing quality and environmental objectives.

We undertake to comply with applicable laws and regulations, customer requirements and internal regulations in order to ensure:

- Continual improvement of our system
- Customer satisfaction
- Respect for the environment and prevention of pollution.
- Information and training for our workers in relation to the general and specific hazards of their jobs and preventive actions by an external health and safety service.

We carry out our commitment by appropriately implementing our Integrated Quality and Environmental Management System, using the tools that it provides and periodically reviewing evidence of compliance.

The Management periodically sets and reviews objectives, as well as reviewing the System's operation.
